# STORAGE & BACKUP

## About weSystems

As an IT service provider, we are the right partner if you need support in planning, realising and operating IT infrastructures. We focus on providing companies with courage to make a change with the individual planning & operation of the perfect IT solution on a permanent basis. We are large enough to implement complex and demanding projects and small enough to offer the necessary flexibility and agility.

## When standard IT is not enough

*The special feature of our FlexStorage service is the combination of various elements to achieve the performance that moves you forward. We create hybrid, flexible and customised storage solutions.*

### High Performance Storage

- Maximum performance through by utilizing the fastest memory available
- Combination of Persistent Memory & NVMe SSDs
- Extremely fast access to large data volumes
- Highest bandwidth & IOPs at lowest latencies
- High availabilty & redundant

### Performance Storage

- Distributed file system via multiple nodes in the cluster based on NVMe SSDs of highest performance
- Provides protocols such as RBD, CephFS, NFS, SMB, iSCSI
- Self-healing mechanism in the event of hardware faults
- Suitable for block & file storage

### Backup Storage

- Highest security for your sensitive data
- Usable as a storage destination for data from existing environments, such as your data center & office
- Mapping of individual backup requirements
- Suitable for object (S3) & file storage

- Certified according to ISO 27001
- Data centers in Germany & Europe

- We bring experience and valuable ideas from projects that have already been successfully implemented
- Do you need support? Our support is always ready to assist you competently
- With our storage & backup service we make your business more secure, efficient & scalable

> As part of our automated industry 4.0 production process, images are generated daily by the industrial cameras we manufacture, as well as other product-specific data in the gigabyte range, which we archive for years. These data volumes must be able to scale with production and be retrievable at any time. Due to the excellent personal support, we have chosen weSystems and the secure & feature-rich S3 object storage in Germany. The attractive conditions round off the great package. We look forward to many more projects.

Markus Jürgens, CIO, Allied Vision Technologies GmbH
